Joint EP Resolution

Prof. Dr. Massimo Zucchetti
expert and author of the book
DEPLETED URANIUM

Emmanuel Jacob
President of EUROMIL

Ria Verjauw
Board Member of ICBUW

Tuesday 31 March 2009, 10:30

European Parliament, Brussels, Press room OA50, PHS Building

About the book DEPLETED URANIUM by Prof. Massimo Zuchetti

A scientific approach to the hazards of military use of depleted uranium

The author, Massimo Zucchetti is a full Professor of Radioprotection and Safety and Risk Analysis at the Polytechnic University of Engineering in Turin, Italy. His research interests deal with depleted uranium, radioprotection, nuclear fusion technology, nuclear safety and radioactive waste management. He is coordinator of the "Italian anti-war scientists committee" and he has been scientifically studying investigating DU since 1999.

This publication is a compilation of material from two books, recently published by the same author: "Uranio Impoverito", (CLUT, Turin, Italy, 2006) and "L'atomo militare e le sue vittime", (UTET, Turin, Italy, 2008). It also includes new materials and findings.

On top the outcome of the meeting with NATO Ambassador Martin Erdmann will be presented. What is NATO's view on military use of depleted uranium?
